

LEARNING

HELP YOUR EMPLOYEES SHARPEN THEIR KNOWLEDGE, LEARN NEW SKILLS AND UNLOCK THEIR POTENTIAL WITH ACCESS TO VALUABLE ONLINE LEARNING VIDEOS.

OVERVIEW

This fantastic learning feature gives your business the ability to deliver valuable online video training to your employees through your advantage platform.

The feature comes with over 190 learning videos covering specific software training for Microsoft Excel, Word, Powerpoint and Outlook as well as soft skills training such as time management, problem solving and teamworking. Each video provides valuable, easy to digest information to help your employees improve their abilities and learn new skills. On top of that, we can host your own learning videos too, so that everything can be conveniently accessed from one place.

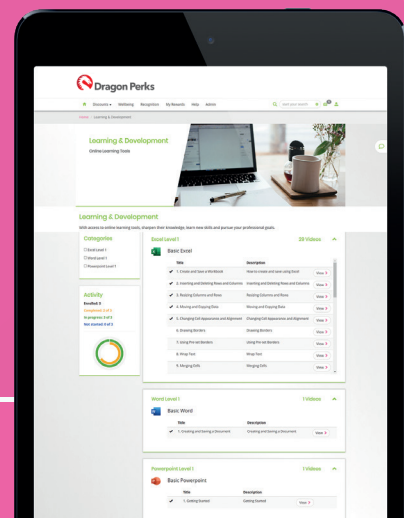

All videos are sorted into categories, so your employees can easily navigate the page to find a video to suit their specific learning requirements. On top of that, they can also keep track of their progress using the handy activity graphic which displays the number of courses they've been enrolled on, completed, started and not yet started.

KEY FEATURES

- Over 190 valuable online learning videos available.
- Employees can track their progress and see which learning videos they have watched.
- Host your own training videos in the portal, so your employees can access everything in one place.
- Find out what videos your employees have watched with a detailed report.
- Simple layout, easy to use.

HOW IT WORKS

- 1 Employees log into their advantage account and click the 'Learning' button on the homepage menu bar.
- 2 Once on the Learning page, employees simply select a video they want to watch.
- 3 Once they have watched the video, their activity will be updated to show they've completed it.
